

Jariel Balberona

Staff-Level Software Engineer | AI-Native Product & Platform Engineering

Philippines | Remote | jarielbalb@gmail.com | +63 917 657 0260
jarielbalberona.dev | github.com/jarielbalberona | linkedin.com/in/jarielbalberona

SUMMARY

Staff-level software engineer with 10+ years of experience building and modernizing production products across frontend, backend, mobile, cloud, and delivery infrastructure. Strong in TypeScript, React and Next.js, Node.js, PostgreSQL, multi-tenant SaaS, offline-first systems, AWS, Azure, automated QA, observability, and production operations. Designs AI-native engineering workflows that turn scoped product intent into repository-grounded implementation, deterministic verification, bounded correction, and controlled release decisions.

CORE SKILLS

Product and frontend: TypeScript, React, Next.js, Astro, Vite, Tailwind CSS, shadcn/ui, TanStack Query, Zustand

Backend and data: Node.js, Express, Go, REST APIs, PostgreSQL, Drizzle ORM, Prisma, Redis, WebSockets

Mobile and architecture: React Native Expo, Multi-tenant SaaS, Offline-first systems, Domain boundaries, Synchronization, Event-driven workflows

Testing and verification: Vitest, Playwright, API integration tests, Regression checks, Automated QA, Runtime verification

Cloud and delivery: AWS, Azure, Docker, Terraform, GitHub Actions, CI/CD, Grafana, Prometheus, Loki

AI-native engineering: Repository-owned context, Structured agent execution, Closed-loop verification, Bounded correction, Human approval boundaries

EXPERIENCE

Ordr.now | Founder & CTO | Self-employed

Oct 2025 - Present | Philippines | Remote

Own product direction, architecture, implementation, verification, and cloud delivery for a multi-tenant hospitality platform.

Tech: TypeScript, React, React Native Expo, Node.js, PostgreSQL, Drizzle ORM, WebSockets, Docker, Terraform, AWS

- Architect and build connected point-of-sale, ordering, kitchen, inventory, and merchant workflows across web and mobile clients.
- Design offline-first synchronization, shared-device recovery, tenant boundaries, and real-time propagation for intermittent connectivity and live venue operations.
- Own frontend, backend, data, infrastructure, automated testing, runtime verification, and production release decisions.
- Establish repository-grounded agent workflows with scoped execution, deterministic quality gates, runtime evidence, bounded correction, and explicit release controls.

PRIVV | Senior Software Engineer | Contract

Feb 2025 - Mar 2026 | Remote

Modernized a mature construction project-management platform while preserving established production behavior.

Tech: React 17-19, TypeScript, Vite, Tailwind CSS v4, TanStack Query, Zustand, Vitest, Biome, Husky, NestJS, PostgreSQL, Monorepo

- Worked with the CTO and design team to shape frontend direction and align architecture, UI implementation, and delivery priorities.
- Led incremental modernization from CRA to Vite, SASS to Tailwind CSS v4, and token-based theming while maintaining production compatibility.
- Re-architected the frontend into feature-based modules and shifted Redux-heavy server-data flows to TanStack Query and Zustand with structured invalidation and optimistic updates.
- Strengthened quality through Vitest, Biome, Husky, regression checks, and stricter modular boundaries; delivered features end to end across frontend and backend.

EXPERIENCE - CONTINUED

DataGPT AI | Software Engineer | Part-time contract

May 2025 - Nov 2025 | Remote

Built product interfaces for a chat-driven AI analytics platform, focusing on workflow clarity, analytical depth, and product reliability.

Tech: React, TypeScript, Redux, Data visualization, Analytics UX, Workflow UI

- Expanded in-chat analytics rendering for heatmaps, treemaps, stacked bars, and other advanced exploratory visualizations.
- Built the Agents V1 orchestration interface, a node-based workflow builder covering data source, prompt, condition, and recipient flows.
- Improved asynchronous query progress, result, and failure states so analytical workflows were easier to understand and trust.

Experience Digital | Senior Software Engineer to DevOps Engineer | Full-time

Mar 2022 - Oct 2024 | New South Wales, Australia | Remote

Progressed from product engineering into DevOps and cloud-platform work across modernization, delivery systems, observability, and reporting infrastructure.

Tech: Next.js, React, TypeScript, Jotai, tRPC, Prisma, Docker, Terraform, GitHub Actions, AWS, Azure, Grafana, Prometheus, Loki, Power BI

- Modernized an established product through incremental adoption of Next.js, Tailwind CSS, Jotai, tRPC, and Prisma while preserving its existing database and production behavior.
- Improved React performance and frontend responsiveness through stronger state, data-fetching, and rendering discipline.
- Built and maintained CI/CD pipelines and infrastructure automation with Terraform and Docker, improving release repeatability and reducing manual operational work.
- Supported production observability with Grafana, Prometheus, and Loki, plus cloud data-platform and reporting work across AWS and Azure.

Chorefree Living | Front-end Lead Software Engineer | Full-time

Apr 2021 - Mar 2022 | Vancouver, Canada | Remote

Led frontend engineering for a service-booking platform covering customer, appointment, and scheduling workflows.

Tech: React, TypeScript, Apollo GraphQL, Gatsby, SASS

- Owned frontend structure and hands-on delivery across customer-facing booking and scheduling workflows.
- Improved data-fetching behavior with Apollo Client and added error tracking and analytics instrumentation.
- Established maintainable component and delivery patterns that supported continued product growth.

EARLIER EXPERIENCE

Arcanys | Web Software Developer | Full-time

Mar 2020 - Apr 2021 | Cebu, Philippines

Web application development, REST integrations, and production feature delivery.

Unpuzzle Marketing Consultants | Freelance Software Engineer

Jan 2020 - Dec 2020 | Remote

Freelance software engineering and web product delivery.

IdeaRobin | Fullstack JavaScript Developer | Full-time

Mar 2018 - Feb 2020 | Cebu, Philippines

Frontend and backend JavaScript development, real-time applications, cloud delivery, and CI/CD.

IdeaRobin | Software Engineering Intern

May 2017 - Mar 2018 | Cebu, Philippines

Frontend implementation, web integrations, and engineering support.

Upwork and Elance | Freelance digital and software work

2014 - 2017 | Remote

Web development, design support, and remote client work.
