

Jariel Balberona

Staff-Level AI-Native Software Engineer

Philippines | Remote | jarielbalb@gmail.com | +63 917 657 0260 | jarielbalberona.dev | github.com/jarielbalberona | linkedin.com/in/jarielbalberona

SUMMARY

Staff-level software engineer with 10+ years of experience building and modernizing production products and platforms. Strong across TypeScript, React and Next.js, Node.js, PostgreSQL, multi-tenant SaaS, offline-first systems, AWS, Azure, automated QA, observability, and production delivery. I specialize in AI-native product development and governed agentic engineering systems that move from product intent through scoped implementation, verification, bounded correction, and accountable release decisions.

CORE SKILLS

Product and frontend: TypeScript, React, Next.js, Astro, Vite, Tailwind CSS, TanStack Query, Zustand

Backend and data: Node.js, Express, Go, REST APIs, PostgreSQL, Drizzle ORM, Prisma, Redis, WebSockets

Architecture: Multi-tenant SaaS, Offline-first systems, Domain boundaries, Synchronization, Event-driven workflows

Cloud and delivery: AWS, Azure, Docker, Terraform, GitHub Actions, CI/CD, Observability, Automated QA, Runtime verification

AI-native engineering: Repository-owned context, Structured agent execution, Closed-loop verification, Bounded retries, Human approval boundaries

EXPERIENCE

Ordr.now | Founder & CTO / Staff AI-Native Software Engineer | Self-employed

Oct 2025 - Present | Philippines | Remote

Own product direction, architecture, implementation, verification, and cloud delivery for a multi-tenant hospitality platform.

Tech: TypeScript, React, Node.js, PostgreSQL, Offline-first synchronization, AWS

- Build connected point-of-sale, ordering, kitchen, inventory, and operational workflows for hospitality teams.
- Own frontend, backend, data, synchronization, automated testing, runtime verification, and release decisions.
- Apply repository-grounded agent workflows to scoped implementation, deterministic quality gates, bounded correction, and accountable delivery.

PRIVV | Senior Software Engineer | Contract

Feb 2025 - Mar 2026 | Remote

Contributed to frontend modernization for a mature capital-project platform with dense planning workflows.

Tech: React, TypeScript, Vite, Tailwind CSS, TanStack Query, Zustand, Vitest

- Improved component, state, and server-data boundaries across a large React application.
- Supported incremental modernization while preserving established production behavior.
- Strengthened automated verification and modular ownership around changed frontend behavior.

DataGPT AI | Software Engineer | Part-time contract

May 2025 - Nov 2025 | Remote

Built product interfaces for AI-assisted analytics with an emphasis on understandable query, result, and failure states.

Tech: React, TypeScript, Data visualization, Analytics UX

- Built and refined user-facing analytics interfaces.
- Made asynchronous query progress, results, and failure behavior easier to understand.
- Extended presentation support for more complex analytical visualizations.

Experience Digital | Senior Software Engineer to DevOps Engineer | Full-time

Mar 2022 - Oct 2024 | New South Wales, Australia | Remote

Progressed from product engineering into DevOps and cloud-platform work across modernization, delivery systems, observability, and reporting infrastructure.

Tech: Next.js, React, TypeScript, Docker, Terraform, AWS, Azure, Grafana, Prometheus, Loki

- Modernized existing application surfaces incrementally while preserving production behavior.
- Built and maintained CI/CD and infrastructure automation.
- Supported observability and cloud data-platform work across AWS and Azure.

Chorefree Living | Front-end Lead Software Engineer | Full-time

Apr 2021 - Mar 2022 | Vancouver, Canada | Remote

Led frontend engineering for a service-booking platform covering customer, appointment, and scheduling workflows.

Tech: React, TypeScript, Apollo GraphQL, Gatsby, SASS

- Owned frontend structure and hands-on feature delivery.
- Improved data-fetching behavior, error visibility, and analytics instrumentation.
- Supported maintainable product growth across customer-facing workflows.

SELECTED WORK**Ordr.now | Founder-led product | Oct 2025 - Present**

Multi-tenant hospitality platform spanning offline-first point of sale, ordering, kitchen operations, inventory, synchronization, and cloud delivery.

Tech: TypeScript, React, Node.js, PostgreSQL, Drizzle ORM, WebSockets, Docker, AWS

- Own product direction and technical delivery across application, data, synchronization, quality, and release systems.
- Design for intermittent connectivity, shared devices, multi-tenant boundaries, and live operational workflows.
- Use governed agent execution with repository context, automated gates, runtime evidence, bounded retries, and human approval boundaries.

EARLIER EXPERIENCE**Arcanys | Web Software Developer | Full-time**

Mar 2020 - Apr 2021 | Cebu, Philippines

Web application development, REST integrations, and production feature delivery.

Unpuzzle Marketing Consultants | Freelance Software Engineer | Freelance

Jan 2020 - Dec 2020 | Remote

Freelance software engineering and web product delivery.

IdeaRobin | Fullstack JavaScript Developer | Full-time

Mar 2018 - Feb 2020 | Cebu, Philippines

Frontend and backend JavaScript development, real-time applications, cloud delivery, and CI/CD.

IdeaRobin | Software Engineering Intern | Internship

May 2017 - Mar 2018 | Cebu, Philippines

Frontend implementation, web integrations, and engineering support.

Upwork and Elance | Freelance digital and software work | Freelance

2014 - 2017 | Remote

Web development, design support, and remote client work.
